OBJECTIVE: I am a test automation engineer focused on building complex automated test systems to ensure high quality releases with a focus on customer satisfaction.

SKILLS:

- **Proficiencies in** Selenium, Appium, JUnit, NUnit, Ginkgo/GoTest, SQL, Allure reporting, C#, Java, GoLang, Jenkins, TeamCity, Postman, AGILE development, GitHub, Jira
- **Experienced with** Playwright, Cypress, JMeter, Javascript, Typescript, AWS, Datadog, Docker
- **Exposure to** Kubernetes, Azure, Python, Robot, k6

WORK EXPERIENCE:

Automation Engineer VI – Stash, New York NY May 2022 – May 2024

- Developed automated tests to ensure that all backend banking transactions were working upon every deployment
- Fostered a new test framework which was implemented to test both our subscriptions collections as well as transaction orchestration

Senior QA Engineer – AccuLynx, Beloit WI May 2019 – May 2022

- Created a Java/Appium test framework that ran tests for both iOS and Android mobile apps
- Developed a gRPC/REST API test suite to verify all mobile services were working as expected
- Translated all automated test steps into human descriptive language that could be understood by anyone across the development organization
- Trained new QA team members on how to test our mobile apps, service layers and to write automated tests

System Test Engineer – Practice Velocity, Machesney Park IL May 2016 – May 2019

- Worked with a team of system testers to ensure the quality release of our EMR and Medical Billing software
- Tested hotfixes, major releases, IT and DB changes during our overnight outage window
- Developed and maintenance automated test cases
- Created and triaged bugs found during each release cycle to ensure that all defects were either resolved or marked as non-critical for the release

Customer Information Analyst – Grainger, Janesville WI Oct 2010 – April 2016

- Enriched customer data via multiple 3rd party sources to help our sales and marketing teams customer targeting
- Created nightly, weekly, monthly and yearly reporting jobs to track customer information initiatives
